Torque ScrewdriverModels 1.5 N.m to 6 N.m (13 lbf.in to 53 lbf.in)

Norbar's new range of Torque Screwdrivers embodies the values of the TT series: accuracy, ease of use and comfort in use. With an accuracy that exceeds the requirement of ISO6789 (\pm 6% for tools up to 10 N.m). Furthermore, they are engineered to retain this accuracy over many thousands of tightened cycles.

- Supplied with a 1/4" hexagon bit holder designed using a 4mm hexagon stem.
- For maximum versatility and particularly for applications with limited access, the bit holder can be removed and replaced with widely available screwdriver blades.
- Easy torque adjustment without the need of additional specialist tools.
- All tools feature a lock to prevent accidental adjustment of the set torque.
- Accuracy exceeds the requirements of ISO6789.
- Traceable calibration certificate for the clockwise direction supplied with all adjustable tools. (not 'P'Types).
- Tool 'slips' when torque is achieved removing the possibility of 'overtightening'.
- Comfortable, durable handle. The handle is constructed using two materials; a base material for strength overlaid with a soft feel grip for comfort and slip resistance.
- Also available in kit form supplied with a range of 12 screwdriver bits.
